The proposed replacement building is within the Greenbelt and an AONB and is contrary to 145 (d) of the NPPF and Policies P1 and P2 of the new Local Plan, being materially larger than the existing building and no special or exceptional circumstances are provided to justify the disproportionate increase in height.

The existing stable building has not been used for horse related purposes, including storage of hay, from at least April 2007 when, in the inspector's decision on an appeal against an enforcement notice for use of the stables for the housing of a generator and domestic storage, (Ref. APP/Y3615/C/06/2006838 dated 19<sup>th</sup> April 2007), the inspector accepted that the stables were redundant and allowed the continued use for domestic storage (but refused use for the generator and associated helicopter landing lights).

The plan accompanying the application is incorrect. The application site is an agricultural field, outside the curtilage of the main dwelling. The plan shows the field as within the curtilage.
